

> JOINT RELEASE FROM MVMA COUNCIL AND MAHTA BOARD

Across Manitoba, veterinarians and animal health technologists (AHTs) work together to provide the best of care to their animal patients and human clients.

The Manitoba Veterinary Medical Association (MVMA) and the Manitoba Animal Health Technologists Association (MAHTA) work hard on behalf of their members – promoting their members' unique roles in animal health care and championing animal health and welfare in the province. This spring, after a legal review of legislation, it became apparent the MVMA would need to assume the registration and regulation of AHTs.

The officials of these associations believe it is important for their respective members be aware of this development. There is much work to be done and this change will not happen overnight. Currently, the MVMA Council and MAHTA Board are in the early stages of reviewing this development to determine what steps need to take place as well as how it will affect the governance and responsibilities of each association. MVMA and MAHTA will keep their members apprised of our progress.

Dr. Marg Seward,
MVMA President

Ms. Jenine Robertson,
MAHTA President
